ABOUT ME

Junior fullstack developer with a focus on React, UX/UI, and information architecture. Experienced in building responsive web applications with API integration, databases, and clear user flows. I combine technical development with user-centered design and aim to contribute to structured, user-friendly digital solutions.

PROJECTS

Cura Quiz – Medical Learning Platform (Production Project)

- Developed an interactive quiz application used by medical students in Gothenburg
- Focused on user flow, clarity, and high usability (UX)
- Built with React, Chakra UI, and backend with API and PostgreSQL
- Implemented dynamic questions, results, and real-time interaction

---

Schedular – Calendar & Planning Application

- Developed a calendar application inspired by Google Calendar
- Implemented scheduling, activity management, and time structuring
- Fullstack solution using React, Python/API, and PostgreSQL
- Focus on UX and information architecture

CryptoCoin – Cryptocurrency Web App

- Developed a web application for tracking and managing cryptocurrency investments

- Implemented dynamic data handling and user interaction
- Focus on responsive design and clear information structure

BlueSky Project – Full-Stack Web Application

- Developed an application for creating and publishing content
- Implemented input handling, validation, and user interaction
- Worked with both frontend and backend (Java)

WORK EXPERIENCE

Web Developer Intern – Cloudo AB
2025 (4 months)

- Developed and restructured a company website using WordPress
- Worked with UX/UI and information architecture
- Improved user experience and content structure

Terminal Worker – Schenker (via StudentConsulting)
2024

- Handled and sorted deliveries in a fast-paced environment
- Collaborated in teams to improve workflow efficiency

EDUCATION

Information Architecture – Malmö University
2023 – Present

- Focus: Web development, UX/UI, and information architecture
- Experience in frontend (React), backend (Node.js, Python), and databases (MySQL, PostgreSQL)
- Worked with Figma, UI design, and UX analysis
- Conducted website analysis focusing on usability, structure, and improvements
- Experience with REST APIs, Agile (Scrum), and user-centered design

---

Technical Program (Information & Media) – NTI Gymnasiet, Malmö
2020 – 2023

- Specialization in programming, media, and IT-related subjects.

SKILLS
