AMJAD SHARQAWI

Fullstack / Frontend Developer (React)

Malmö, Sweden | 070-021 53 51 | amjadsharqawi20@gmail.com | github.com/Sharqawi02 | amjadsharqawi.com

SUMMARY

Fullstack developer specializing in React, JavaScript, and UX/UI-driven web development. Experienced building full-stack applications with REST API integration, relational databases (PostgreSQL, MySQL), and responsive, user-centered interfaces. Background in information architecture, usability testing, and Agile/Scrum development. Delivered a production quiz platform used by medical students and multiple full-stack applications spanning React, Node.js, Python (Flask), and Java.

TECHNICAL SKILLS

Languages & Frontend: JavaScript, HTML5, CSS3, React, React.js, Responsive Web Design

Backend: Node.js, Python (Flask), Java, REST API Development, JSON

Databases: PostgreSQL, MySQL, Relational Database Design

UX/UI: Figma, Wireframing, User Flows, Usability Testing, Information Architecture

Tools & Methods: Git, GitHub, WordPress, Agile, Scrum, Full-Stack Development

Languages Spoken: Swedish (Fluent), English (Professional Working Proficiency), Arabic (Native)

WORK EXPERIENCE

Web Developer Intern — Cloudo AB

2025 (4 months)

- Redeveloped and restructured a company website using WordPress, improving content structure and overall user experience.
- Applied UX/UI and information architecture principles to reorganize site navigation and content hierarchy.
- Collaborated with stakeholders to translate business requirements into usable web page structures.

Warehouse & Logistics Experience

Warehouse Worker — Airme *Jul 2022 – Nov 2023*

Terminal Worker — DSV (formerly Schenker, via StudentConsulting) *2024 – Present*

- Handled deliveries, sorting, and warehouse operations in fast-paced logistics environments while completing technical studies; built reliability, teamwork, and time-management skills.

PROJECTS

Cura Quiz — Medical Learning Platform — Production Project

- Built a production interactive quiz application actively used by medical students in Gothenburg.
- Designed user flows and interface with a focus on clarity and high usability (UX).
- Developed frontend with React and Chakra UI; built backend with REST API and PostgreSQL.
- Implemented dynamic question sets, live results, and real-time interaction.

Schedular — Calendar & Planning Application — Personal Project

- Built a full-stack calendar application inspired by Google Calendar using React, Python/API, and PostgreSQL.
- Implemented scheduling, activity management, and time-structuring features.
- Applied UX and information architecture best practices to the interface design.

CryptoCoin — Cryptocurrency Tracking Web App — Personal Project

- Developed a web application for tracking and managing cryptocurrency investments.
- Implemented dynamic data handling and interactive user features.
- Focused on responsive design and clear information architecture.

BlueSky Project — Full-Stack Content Publishing App — Personal Project

- Built a full-stack application for creating and publishing content using Java on the backend.
- Implemented input handling, validation, and interactive user features.

EDUCATION

Bachelor's Degree, Information Architecture — Malmö University

2023 – 2026

- Focus: Web development, UX/UI, and information architecture.

- Coursework in frontend (React), backend (Node.js, Python), and databases (MySQL, PostgreSQL).
- Applied Figma, UI design, and UX analysis; conducted usability-focused website audits.
- Experience with REST APIs, Agile (Scrum), and user-centered design methodology.

Technical Program — Information & Media — NTI Gymnasiet, Malmö *2020 – 2023*

- Specialization in programming, media, and IT-related subjects.

ADDITIONAL INFORMATION

- Category B Driver's License (manual); familiar with logistics and warehouse systems.
